

INSTITUTE of ECOLOGY and ENVIRONMENTAL MANAGEMENT

Developments in the Ecology Profession Membership Survey 2007

This survey has been far more comprehensive than the original one carried out in 1992 and illustrates the present state of the profession and how it has developed.

The Survey ran between March and June 2007 and closed with a very pleasing 1,156 respondents (~1/3 of members).

Some of the initial findings have already been used in an article in *The Guardian* newspaper¹ and there will be a full report on the survey in the December 2007 edition of *In Practice*.

Below are a few of the major findings of the survey, with in some cases reference to the 1992 survey (160 responses).
